- Thai
- English (TOEIC 790)

PROFESSIONAL SUMMARY

I graduated from the Generation Thailand Bootcamp, where I acquired essential technical and soft skills for transitioning from a two-year career in the document verification industry. My genuine interest in software development is supported by robust technical abilities. Dedicated, hardworking, and consistently eager to learn, I am ready to apply my skills in a challenging Test Engineer role.

EXPERIENCE

Quality Control Officer   July 2022 - Present
ShopeeXpress (Thailand) Co., Ltd. (Outsource)
- Examined employee work to ensure parcel deliveries followed established processes, emphasizing attention to detail
- Verified compliance with PDPA law through analysis of submitted data, confirming adherence to procedures and privacy regulations
- Managed 3,200 cases on a weekly basis, proactively engaging with customers to address issues or errors encountered with delivery drivers

Junior Software Developer Cohort 5 Bootcamp   July 2023 - October 2023
Generation Thailand
- Constructed a workout tracking website with responsive designs for both desktop and mobile platforms, employing the MERN Stack, which includes MongoDB, Express.js, React.js, and Node.js
- Attained essential behavioral skills for various aspects of life, encompassing the cultivation of a growth mindset, effective communication, personal responsibility, and persistent determination
- Crafted multiple mini-projects utilizing HTML, CSS, Tailwind CSS, JavaScript, and React JS, including the development of CRUD React JS projects
- Executed software testing protocols for all website functions

KYC Officer   April 2021 - June 2022
Bitkub Online Co., Ltd (Outsource)
- Confirmed the identity verification lists before setting up a customer account
- Proactively investigated potential high-risk aspects of clients' occupations, promptly reporting as needed, and obtaining essential documentation for comprehensive customer profiles
- Successfully met daily KPIs, achieving high-performance ratings, and earning a promotion to the Data Cleansing position

SIDE PROJECTS

Software Testing Manual By P'Beam Course
- Created and executed a diverse set of test cases for a Web application, covering critical aspects such as Facebook Login, Register Page, Payment Application, Tour Booking Feature, Hotel Telephone System, and the Default Page for the 'Paotang' Application
- Developed a test scenario for the E-Commerce Application
- Constructed a flowchart and generated a test report
- Acquired a fundamental understanding of QA testing concepts and the Software Development Life Cycle, Agile methodology, and exploring various testing types, including UAT tests and End-To-End tests
